### Illinois Farm Work Well Advanced All Over the State.

REPUBLIC SPECIAL.
Springfold, III., Sopt 25.—The weekly climate and crop bulletin of the Illinois section of the Weather Bureau, United States Department of Agriculture, was insued to-day as follows:

The last week has been faverable for fall farm work, Good rains have falles throughout the State, justing the ground in excelent condition for prepaintion for fall sections, but the rain has generally not been sufficient to deling farming operations. Over a part of the southern district the ground is still the dry for plowing.

The weather was cool early in the week, and light fresh occurred in the central and northern districts, which however, apper 69 have done to dumage. Nuch isn'd may already been prepared for seeding, and some sending his been done. Frequentions up to the present thus bedients that the sorreage sown to whent this year will be suitable than usual. The earlier corn tree, except a few hise please, is now asfe from frost, and great progress has been made in putting it in shock. In a few places less than usual will be cut for fedder, because the leaves have been stripped from the stock by high whole. In some localities corn is now ready to be cribbed.

Broomeorn, tolacce and claver have practically all been harvested. Pointness are being dug, and a fair to good yield is being turned out. Pastures over a large part of the State are in excellent condition, and offer fine prospects for fail feed. In a few localities in the south and wost pastures are very poor. In a few localities we dropping has continued since the high whole of the lith that, and trees are almost entirely stripped of fruit.
